PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with 2+ years of professional experience designing and delivering enterprise-grade web applications, RESTful APIs, and cloud-deployed analytics platforms. Specialized in React.js, TypeScript, and Python (FastAPI/Django) with hands-on expertise in Microsoft Azure, CI/CD automation, and supply chain analytics. Proven track record of measurable performance improvements, faster release cycles, and production-ready software for global clients in Agile/Scrum environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Redux Toolkit, React Query, jQuery, Jinja, Bootstrap, Responsive Design, Figma
Backend & APIs: FastAPI, Flask, Django, Node.js, Express.js, RESTful APIs, Microservices, JWT Authentication
Cloud & DevOps: Microsoft Azure (Monitor, App Insights, ARM Templates, Azure DevOps, Container Instances), CI/CD, Docker, Git
Databases: MySQL, MSSQL Server, MongoDB, SQLite, SQL Query Optimization, Indexing, Schema Design
Testing & Analytics: Jest, Playwright, Unit/E2E Testing, Power BI, Excel, Power Query, Chart.js
Methodologies: Agile/Scrum, System Architecture, Code Review, Technical Documentation, SDLC

PROFESSIONAL EXPERIENCE

Valtitude Technologies India Private Limited — Pune, India
Software Engineer — *Sep 2025 – Present*

- Engineered the full-stack frontend of an enterprise Demand Planning & Forecasting platform using React.js and TypeScript, enabling 10+ global supply chain client accounts to manage S&OP workflows, scenario planning, and demand sensing from a unified interface.
- Architected RESTful API integrations with Python FastAPI/Flask microservices backend for real-time data flow across forecasting and scenario planning modules, reducing manual data reconciliation effort by ~40% for planning teams.
- Designed a library of 50+ reusable React components with React Query (server-state) and Redux Toolkit (app-state), cutting cross-team UI development time by ~35% and ensuring consistent UX across product modules.
- Built comprehensive testing strategy with Jest (unit/integration) and Playwright (E2E), achieving 80%+ code coverage and enforcing automated quality gates — reducing post-release defects by ~60%.
- Engineered Azure DevOps CI/CD pipelines with multi-stage build, test, and deploy workflows, compressing deployment cycles from 3+ days to same-day releases and enabling multiple production deployments per sprint.
- Integrated Azure Monitor and Application Insights for real-time observability and alerting, reducing Mean Time to Resolution (MTTR) by ~50%; optimized SQL queries for analytics workloads, cutting report generation time by ~45%.
- Provisioned Azure cloud infrastructure via ARM templates; developed Power BI dashboard integrations for executive KPI reporting; authored API contracts (OpenAPI/Swagger), architecture diagrams, and deployment runbooks.

SOPEONOW — Remote
Software Engineer — *Jan 2025 – Aug 2025*

- Led development of 5+ high-traffic responsive web features for enterprise clients using React.js and TypeScript, achieving Lighthouse performance scores of 90+ and collaborating with backend engineers to design 15+ type-safe RESTful API endpoints.
- Contributed to Python/Django backend feature development; resolved 20+ production defects through root cause analysis, reducing the critical bug backlog by ~65% over 3 months.
- Operated within Agile/Scrum ceremonies — sprint planning, code reviews, daily standups, retrospectives — consistently delivering features on schedule across 6+ product sprints.

SOPEONOW — Remote
Frontend Developer — *Feb 2023 – Oct 2023*

- Developed and maintained 3+ production web applications using React.js, JavaScript (ES6+), HTML5, CSS3, jQuery, and Jinja, ensuring cross-browser compatibility and performance for enterprise clients.
- Architected an internal CSS component library of 30+ UI components and design tokens, standardizing patterns across 4 engineering teams and reducing frontend onboarding time by ~25%.
- Delivered pixel-perfect responsive UIs from Figma designs, reducing design-to-development handoff cycle by ~20% through reusable component abstractions and shared design token usage.

PROJECTS

FullStack Pro — Developer Documentation Hub | *Next.js, React.js, MDX, Tailwind CSS, Vercel* *Live*

- Engineered a comprehensive full-stack developer documentation platform covering Python, JavaScript, React, Node.js, databases, system design, and DevOps — with structured navigation, search, and code-highlighted reference pages serving active developer users.
- Deployed on Vercel with optimized static generation (SSG) via Next.js, achieving sub-1s page load times, 95+ Lighthouse scores, and SEO-optimized metadata across all documentation routes.

RemoteRise — Remote Job Board Platform | *React.js, Next.js, REST APIs, Tailwind CSS, Vercel* *Live*

- Built a fully responsive remote job discovery platform featuring role-based browsing, dynamic job filtering by category and skills, and optimized listing pages with server-side rendering for fast, SEO-friendly job post indexing.
- Implemented reusable component architecture with React hooks for state management, enabling clean separation of concerns and reducing UI iteration time during feature additions.

FlowNote — Notion-like Note Taking App | *React.js, Node.js, MongoDB, JWT Auth, Vercel* *Live*

- Architected a rich text note-taking application with Notion-like block-based editing, nested page hierarchy, real-time auto-save, and JWT-based authentication — supporting full CRUD operations across personal workspaces.
- Designed and implemented RESTful API backend with Node.js and MongoDB supporting document versioning, workspace isolation per user, and optimized query patterns for low-latency content retrieval.

EDUCATION

MET Institute of Computer Science, Mumbai University *2023 – 2025*
Master of Computer Applications (MCA) — 8.84 CGPA

Swami Ramanand Teerth Marathwada University, Nanded *2020 – 2023*
Bachelor of Science in Computer Science — 9.25 CGPA

CERTIFICATIONS

Full Stack Web Development Using React.js — Hong Kong University of Science and Technology (Coursera)*Jan 2023 – Dec 2023*
MERN Stack Development — TechnoGeeks *Jul 2022 – Sep 2022*
Responsive Web Design — freeCodeCamp *Sep 2021 – Oct 2021*

LEADERSHIP & ACTIVITIES

Treasurer — Student Association of Computer Applications (SACA), MET Institute of Computer Science*2023 – 2025*
Volunteer — Tech@MET — Annual Technology Festival, MET Institute of Computer Science *2023 – 2025*
